Release Readiness Checklist

A practical go/no-go review for QA and engineering teams

QAFlex Studio | Free QA Resource

- Confirm scope, acceptance criteria, platforms, and exclusions.
- Review changed components, dependencies, migrations, and flags.
- Review smoke, functional, integration, regression, and exploratory results.
- Document open defects, severity, workarounds, and accepted risks.
- Confirm deployment owner, approvers, window, and communication plan.
- Verify environment, permissions, secrets, backups, and rollback steps.
- Define post-deployment smoke checks and responsible owners.
- Record go/no-go decision, evidence links, and approvers.
